

LIZERNA WS

Liquid natural starch

Properties:

- suitable for all kind of fibres
- even applicable for coloured textiles
- can be pumped
- produces a slight glossy surface

Application:

LIZERNA WS is a stabilised, liquid natural starch. By chosen dispersion agents the product does not sediment and can be pumped. LIZERNA WS can be rinsed in easily and is distributed quickly and even on the fabric. The fine dispersion prevents the typical cloud effect on coloured textiles.

The dosage depends on the requested stiffness and on the textiles:

Table clothes: 12-15 ml/kg (1,84-2,30 fl.oz/10 lbs)
Coats: 8-10 ml/kg (1,22-1,53 fl.oz/10 lbs)
Shirts: 5-8 ml/kg (0,77-1,22 fl.oz/10 lbs)

Technical Data:

Density 20°C (68°F) 1,18 g/ml
pH-value 5 - 6

Contents:

natural starch, dispersion agents, preservatives, water

Storage:

After partial taking out close the packing unit tightly. Protect from longer freezing periods. If sealed in original packing the product can be stored for at least 12 months.
